

PROJECT FOR NON-PROFIT

EVENT SCHEDULER APPLICATION

SHAREPOINT DEVELOPMENT

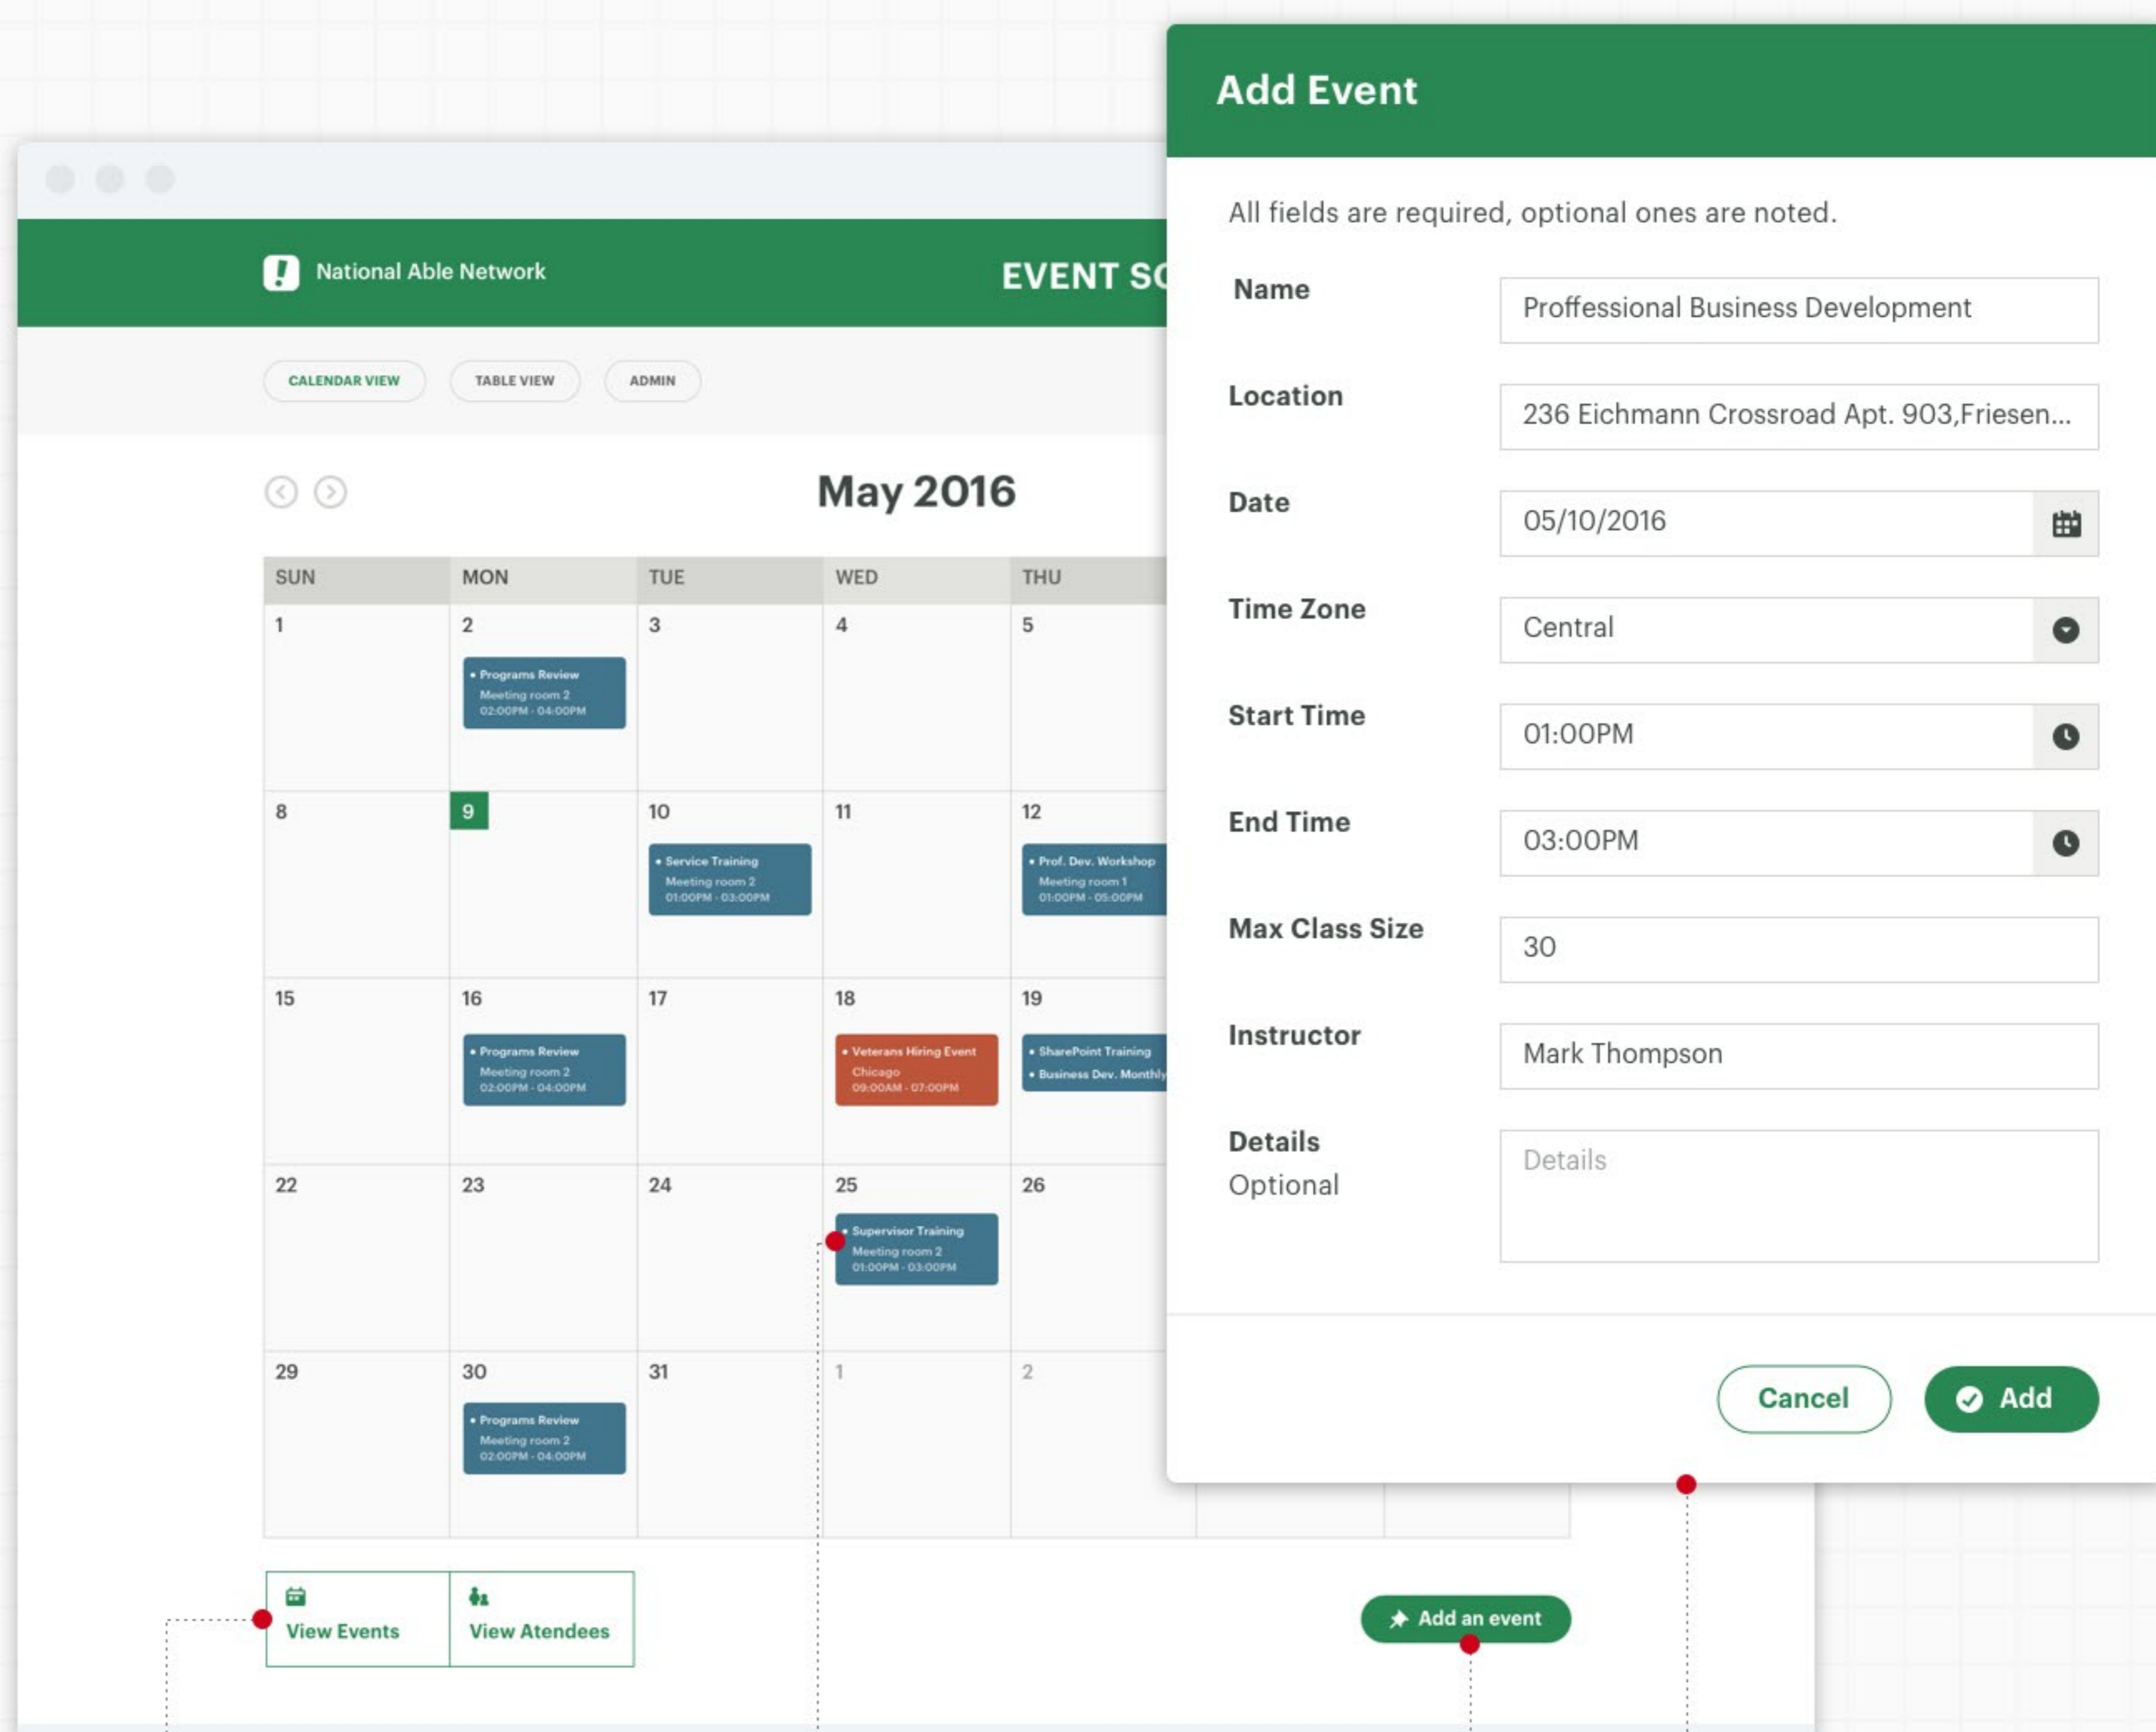

NIFTIT deliver SharePoint implementations for non-profits; from highly advanced integrations, business forms and workflow solutions, to customized SharePoint apps and cloud migrations. We can do it all.

INTUITIVE USER INTERFACE

The Event Scheduler application allows users an at-a-glance view of all training opportunities available on a specific month. Interested users can quickly subscribe via the registration screen.

CUSTOM VIEWS

With the calendar acting as the default view, users can alternatively choose to see a listing summary of events.

CUSTOM CONTENT

A simple presentation of events affords users the most essential information; event name, location and timing.

ADD EVENT MODAL

Administrators and team leaders have permission to add events; utilizing custom date and time-picker widgets.

BUILT USING SHAREPOINT APPLICATION DEVELOPMENT, MODEL ON AN OFFICE 365 ENVIRONMENT

Custom applications are developed using Microsoft's Visual Studio integrated developer environment. Apps provide custom functionality based on business requirements that are not covered out-of-the-box by the SharePoint platform.
