

NATIONAL HEALTHCARE PROVIDER

SHAREPOINT DEVELOPMENT

NIFTIT collaborated extensively with a US-based nationwide healthcare provider. They required an extensive scope of review, redesign and development of their suite of internal software services, built upon the SharePoint platform.

DISCOVERY & DESIGN

With many layers of specialist knowledge and business practices, NIFTIT committed to a sizeable discovery phase to ensure that our proposed solutions are crafted for maximum efficiency and effectiveness throughout.

CUSTOM DEVELOPMENT

Leveraging the SharePoint architecture, NIFTIT built numerous bespoke systems to collect and store sensitive data securely. Reporting functionalities allow managers to turn data in to useable business information.

BRANDED FRAMEWORK

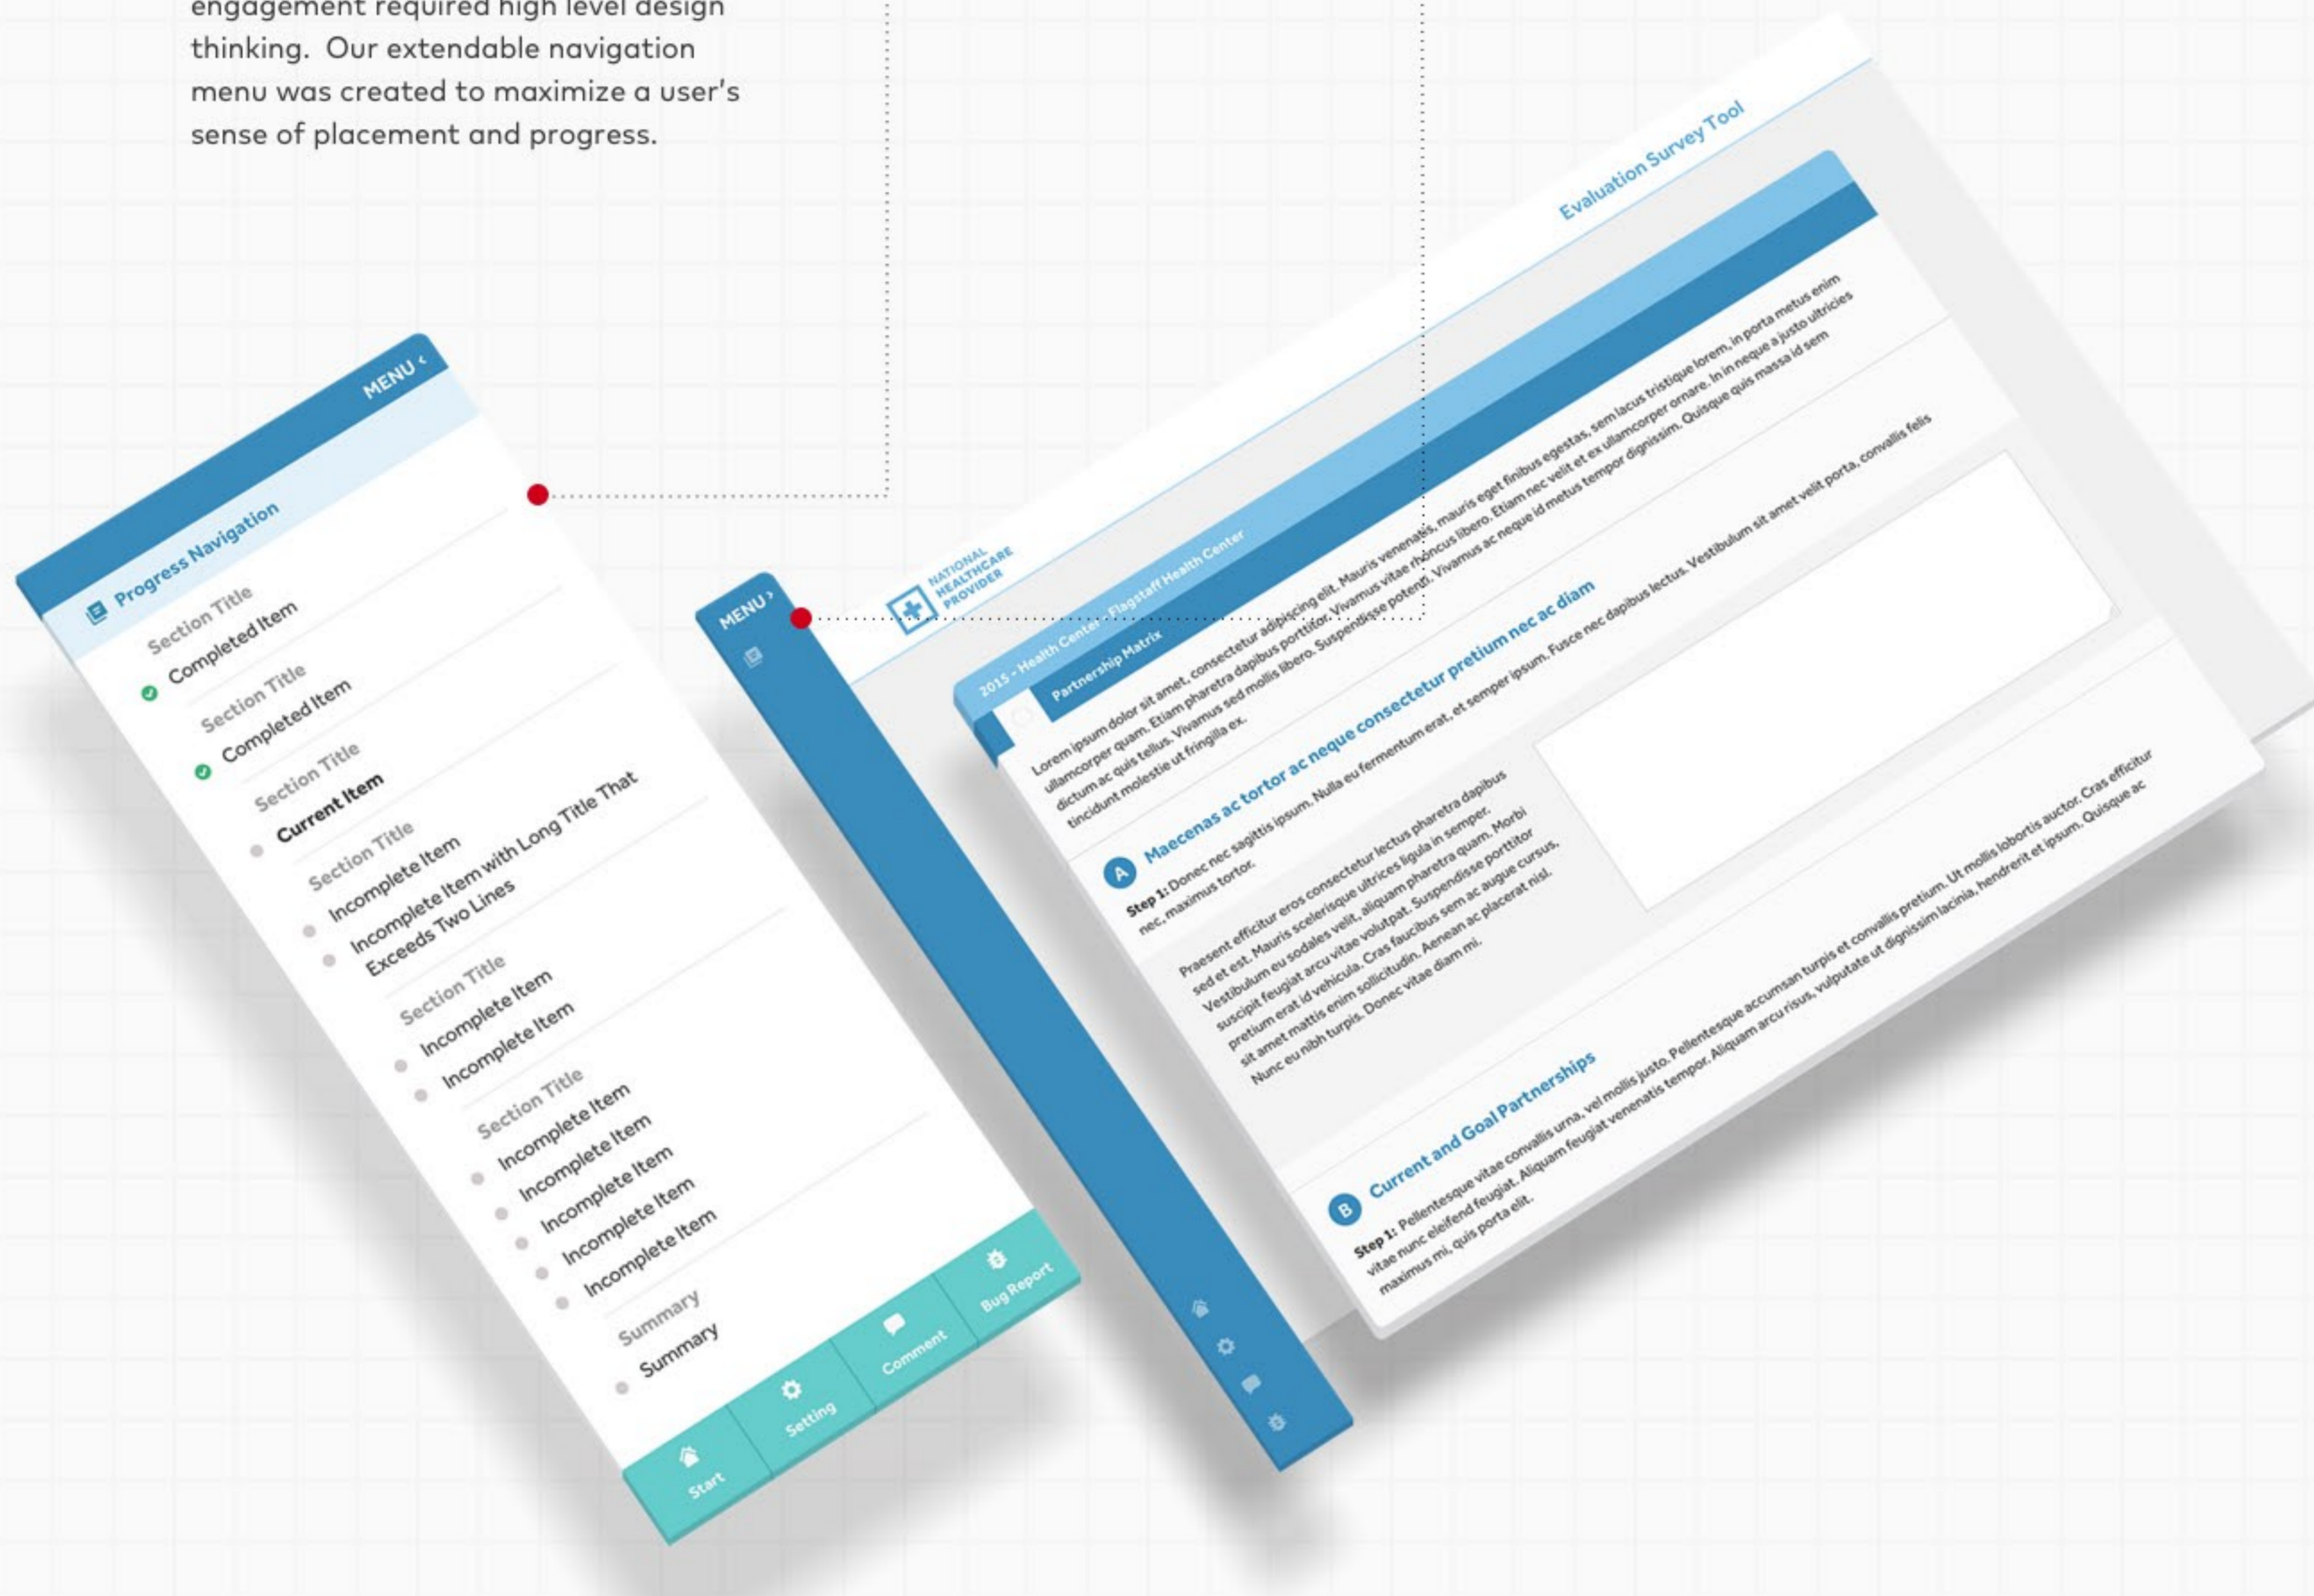

Unrecognizable as a SharePoint platform, the layers of complex business logic and functionality were presented with company branding. A bespoke front-end framework maintains consistency across solutions.

DYNAMIC MULTI-SITE NAVIGATION

Managing the design and development of multiple solutions across a long-term engagement required high level design thinking. Our extendable navigation menu was created to maximize a user's sense of placement and progress.

Expanded: Full view menu, with integrated progress indicators

Default: Minimized navigation bar

ADVANCED UI/UX DESIGN

With numerous data collection points and advanced functionality, we were required to design a fluid and logical user workflow.

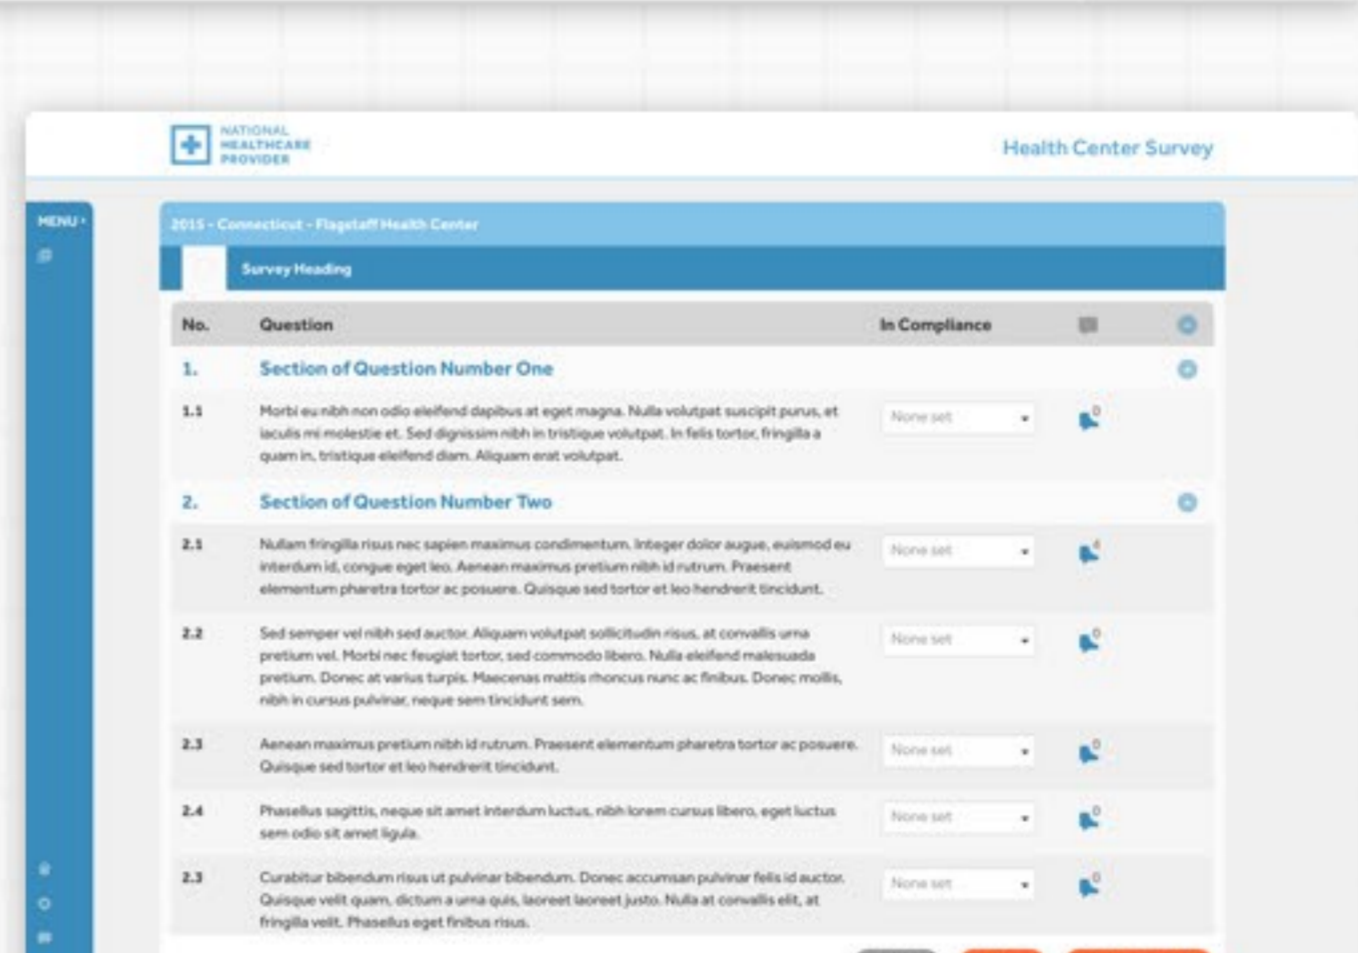

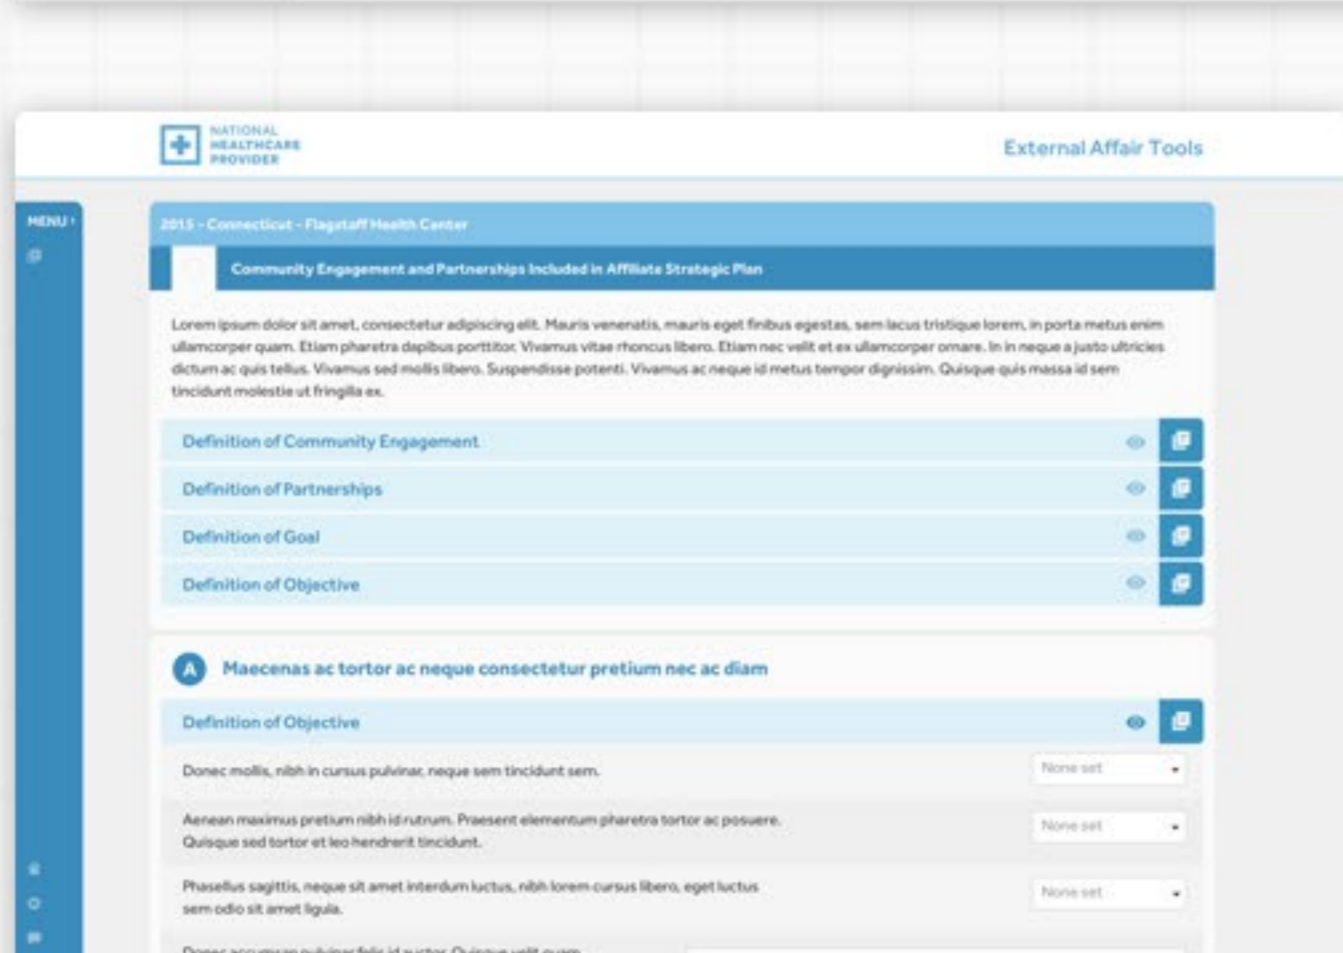

Many layers of nested functionality required much reiteration during the storyboarding phase, resulting in clean and consistent visual signposting for users to monitor progress, validation and submission.

WHAT YOU SEE IS WHAT YOU GET EDITOR

A bespoke WYSIWYG editor was embedded to allow advanced information collection and formatting. This vastly improved readability and digestion of information during reviews and audits by management staff.

Chart ID	Common Information
Group 1 0001	ADA Date: 3/20/2015, Board Date: 3/21/2015, Accreditation Status: Accreditation Status, Entity Type: Affiliate, Entity Name: National Healthcare F
Group 1 0003	ADA Date: 3/20/2015, Board Date: 3/21/2015, Accreditation Status: Accreditation Status, Entity Type: Affiliate, Entity Name: National Healthcare F

NIA 0010	ADA Date: 3/20/2015, Board Date: 3/21/2015, Accreditation Status: Accreditation Status, Entity Type: Affiliate, Entity Name: National Healthcare F

CONSISTENT LANGUAGE

With the requirement of designing hundreds of pages across dozens of systems, it was important that we establish a consistent design language to fit all cases. Our solution was to create a branded UI styleguide document and developer reference platform.

USER ADOPTION AND PERFORMANCE MANAGEMENT

We continue to collaborate with the client in a support capacity - monitoring the performance of our systems, supporting users adopting new workflows and fixing any bugs discovered. Extensive training and document is supplied with each new release.

ALL FEATURES BUILT ON SHAREPOINT 2013 ON-PREMISES

The range of software tools delivered were built upon default and highly-customized SharePoint workflows. Careful configuration of permissions and management of access, security and backup processes maximize protection of sensitive data.
