NIFTIT IT Services
VIRTUALIZATION

vmware®
PARTNER

PROFESSIONAL
SOLUTION PROVIDER

Increase your impact and expand your reach. Take advantage of the cloud to help your organization grow.

Virtualization offers tremendous benefits when adopted with a structured ethodology. It empowers your organization to improve the utilization of infrastructure, while making it faster and easier to provision and manage resources.

NIFTIT works with you to develop and execute a comprehensive virtualization strategy that supports your business objectives while ensuring a seamless transition. Our solutions help your organization leverage the benefits of a virtualized infrastructure, enabling you to operate more efficiently and reliably by delivering applications and services on-demand to any device, anytime, anywhere.

Why NIFTIT ?

Expertise: As a digital agency, NIFTIT employ people from a range of disciplines; developers, designers, and project managers, who are all specialists in their respective fields. Your business will benefit from their collective skillsets, which will ensure your projects are delivered on scope, on time and on budget.

Single point of contact: Having a single point of contact means that all IT issues, service requests, problems and incidents are coordinated directly with NIFTIT. We leverage our established relationships with services providers such as RackSpacet to fix any issues within your network. Our continued and concise communication ensures you are always aware of system statuses and our progress on any technical support.

Cost effectiveness: Working with NIFTIT allows you access to the knowlede and experience of the best digital experts, without the significant overhead of employing them full-time. Our teams have years of experience working with all sizes of organization, handling all the technical requirements to enable your staff to focus on business practices.

Strategic consultancy: With NIFTIT's experience backed up by the expertise of RackSpace, we take care to consider both the needs of your clients and staff, sharing our vast knowledge of best practices and understanding what works in the digital domain.

NIFTIT is certified VTSP and VSP.

Benefits

- Comprehensive virtualization solutions, from strategy to execution to maintenance
- Seamless migration and integration to existing environments
- Virtualized infrastructure based on VMWare/vSphere
- Reduced capital and operating costs
- A team of experts in virtualization as an extension of your IT department

With VMware vSphere you can

- Virtualize business-critical applications to achieve unprecedented flexibility and reliability with the highest levels of availability and responsiveness for all applications and services
- Create resource pools, so that you can deliver the highest levels of application SLAs with the lowest total cost per application
- Be assured you can maintain security, control and compliance over your applications and data in the cloud

List of NIFTIT IT Services:

VMware Consulting
Our team of VMware certified engineers are ready to support you through the planning, conversion, and maintenance of your data center to a fully virtualized environment. NIFTIT provides experienced consulting services that help you find a virtualization strategy, based on best practices, that leverages your existing technology to improve performance, increase security and minimize downtime, and reduce the cost and complexity of delivering enterprise services.

VMware vSphere
Integration of VMware vSphere helps you get the best performance, availability, and efficiency from your infrastructure and applications. It serves as a complete platform for implementing and managing virtual machine infrastructure on a large scale. It also includes the VMware ESXi hypervisor as the virtualization server. NIFTIT has the expertise to support and ease the solution integration to your existing infrastructure following best practices.

Hyper-V to vSphere Migration
Hyper-V and vSphere differ significantly on their ability to scale to serve large organizations. Rapidly growing organizations will find that Hyper-V is too costly and has just enough features to fulfill their business goals thus opt to migrate to vSphere, a pioneer at reducing hardware costs and improving server efficiency. NIFTIT provides the expertise to do a V2V (virtual 2 virtual) migration, from a Hyper-V solution to a VMware solution, and consolidate all the VMs on a VMware solution.

VEEAM Backup Integration
Veeam Backup & Restoration is built specifically for VMware vSphere to provide fast backup and recovery for ESXi virtual machines. It lets you recover entire VMs from the same level backup. VEEAM is recognized as the best VM backup solution.
