

SMILETRAIN INTRANET

SHAREPOINT DEVELOPMENT

NIFTIT deliver SharePoint implementations for non-profits; from highly advanced integrations, business forms and workflow solutions, to customized SharePoint apps and cloud migrations. We can do it all.

BRANDED SHAREPOINT SITE

NIFTIT Creative designed a bespoke front-end template that is aligned to the SmileTrain company branding. Navigation menus, announcement widgets and calendar devices all respect organizational use of color, typography and layout.

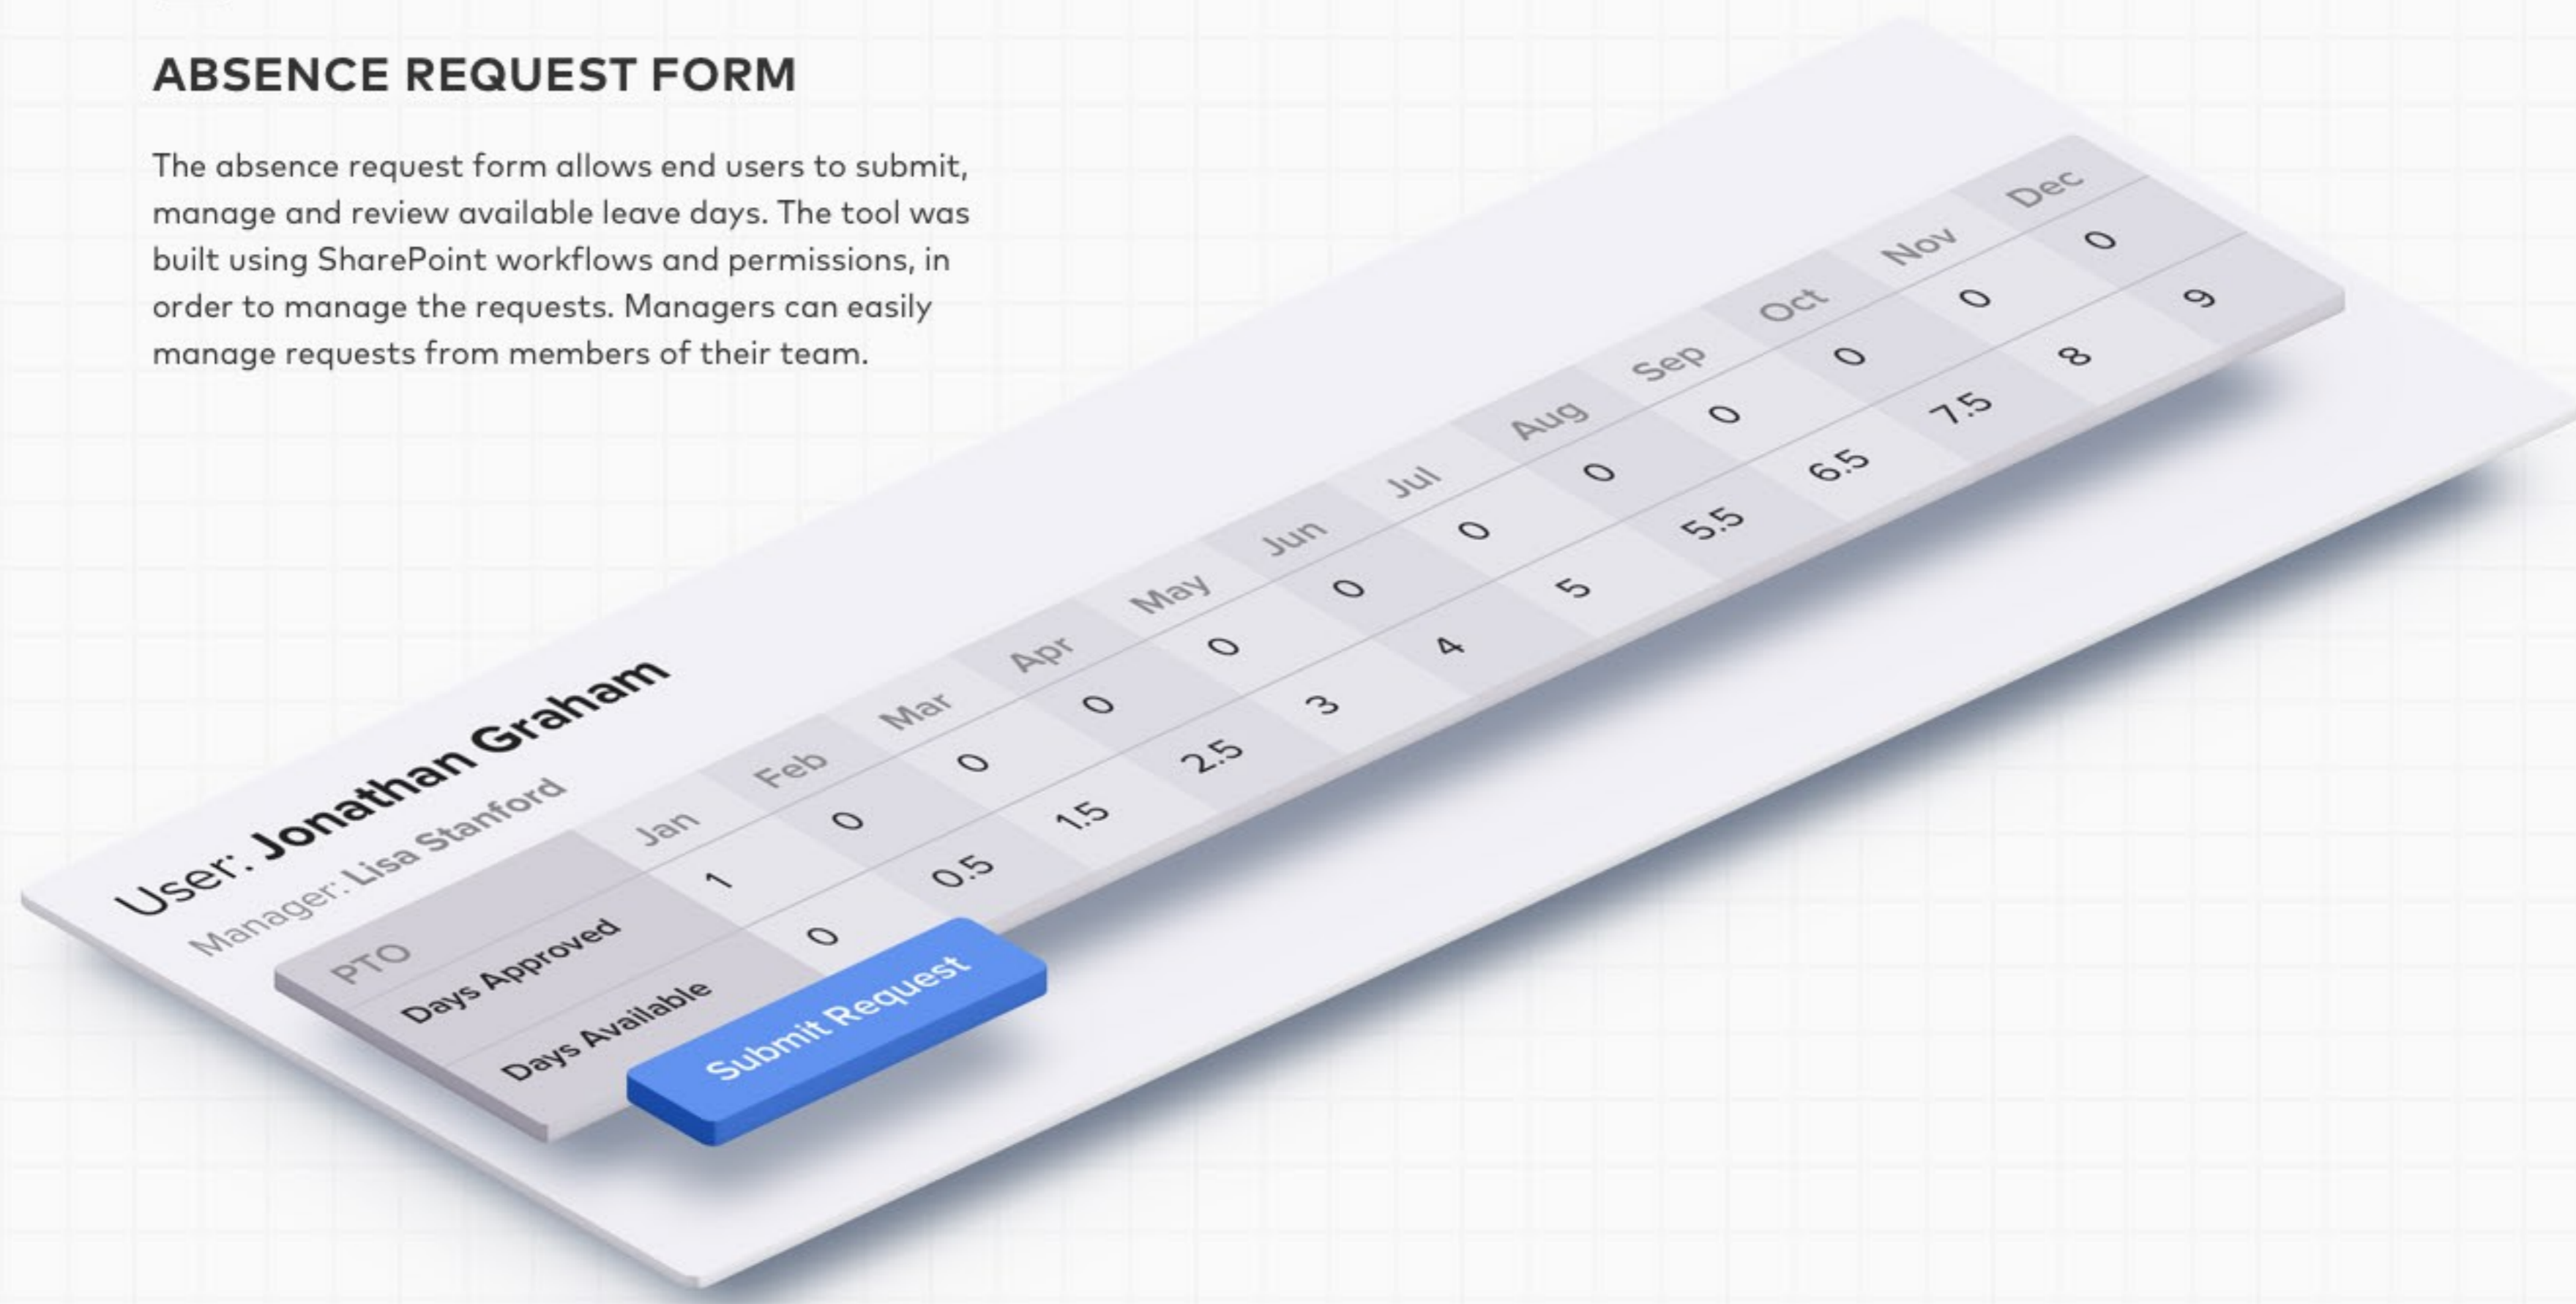

MULTIZONE CLOCK

Custom functionality was built in to keep the worldwide SmileTrain staff in synchronization. A global 'World Clocks' widget is available from any screen for immediate reference. A SharePoint calendar keeps all staff notified of key company events and deadlines.

ABSENCE REQUEST FORM

The absence request form allows end users to submit, manage and review available leave days. The tool was built using SharePoint workflows and permissions, in order to manage the requests. Managers can easily manage requests from members of their team.

ALL FEATURES BUILT ON SHAREPOINT 2013 ON-PREMISE

This On-Premise version of SharePoint 2013 maintains all data and configurations on client-side server solutions. The 2013 build of SharePoint features functionality to support the collection of big data, provide usability for mobile users and improved backwards compatibility for companies upgrading from SharePoint 2010 installations.
